Summary

Software Engineer, specilized in securtity & compliance. Over a decade of professional experience {planning,implementing,securing,maintaining} applications across {industries}. Technical skills needed to implement and scale secure applications, as well as the non-technical skills needed to coordinate projects with clients and stakeholders.

Certifications

AWS Certified AI Practitioner

AWS Certified Security - Specialty

AWS Certified Solutions Architect - Associate

Education

MS	Worcester Polytechnic Institute , Computer Science	Worcester, MA, USA Jan 2013 – Jan 2017
BS	Worcester Polytechnic Institute , Computer Science	Worcester, MA, USA Jan 2013 – Jan 2017

Experience

AWS Professional Services, Security Reliability & Compliance Consultant more detail about the significance of customers and outcomes during this time</TODO> I am currently a Security Consultant for AWS Professional Services, where I work with AWS' largest customers to develop secure cloud applications and infrastructure. Engaging with Global & Strategic AWS Customers to provide high-level guidance as well as technical delivery of secure AWS applications.	remote May 2021 – present 4 years 9 months
WatchGuard Technologies, Senior Development Engineer I was the senior-most member of the engineering team in charge of DNSWatch, a cloud-based DNS security solution. I was responsible for the secure DNS infrastructure, resolving more than 1 billion DNS queries daily to over 10,000 customers, while providing alerts and analytics critical to their security. - Expanding service availability from North America only, to Tokyo, Ireland, and Australia - Rearchitecting the DNS summarization pipeline to support growth from hundreds of clients to tens of thousands - Simplifying production deployments by leveraging infrastructure-as-code and pre-built application images	Wakefield, MA, USA Jan 2018 – Apr 2021 3 years 4 months
Strongarm, Software Engineer I joined Strongarm as an intern in 2015, and eventually as a full-time developer in 2018. I have made significant contributions to every component of the service, continuing to work on it through an acquisition by WatchGuard in 2018. - Meeting with customers to better understand their needs, and help them deploy Strongarm - Growing the engineering team by advertising at career-fairs and conducting interviews with candidates - Triaging and resolving outages and operational issues in production, during shifts of 24/7 on-call availability	Wakefield, MA, USA May 2015 – Jan 2018 2 years 9 months
